PLEASE BE ADVISED OF THE HARRIS COUNTY POLICY REGARDING CULVERT PIPE SPECIFICATIONS

1. The culvert pipe must be stamped or marked with the name of the manufacturer, the production date, and that it is ASTM C76-Class III pipe

OR

2. If the pipe is not stamped or marked, it will be the responsibility of the owner/permittee to provide documentation of the name of the manufacturer and the production date of the pipe being purchased. The County will verify that there are corresponding cylinder breaks that verify the strength of the reinforced concrete pipe produced from that manufacturer for that date. If there are none, the pipe will be rejected as not meeting the requirements of ASTM C76-Class III pipe.

For any questions regarding this matter, please email devinspect@hcpid.org or call 713-274-3924
