BLOCKOUT, INTERIOR DIAPHRAGM AND DRAIN DETAILS

(Shallow Slab) Note:

- Bars Z are required for beams topped with a cast-in-place concrete slab only.
- Place drain holes (1" dia. PVC Sch 40 Pipe) as shown in all beam void areas. Include 3/8" dia. holes in drain holes. Drain holes are not required if the void is filled with expanded polystyrene foam.
- Blockout required at ends of all beams. Extend beam reinforcement into blockouts.
- Cut steel to maintain one inch clear between bars.
- Dimensions will vary slightly with skew. Adjust as necessary.
